MMSA OVERVIEW

About Us

Masia Maths and Science Academy (MMSA) is a non-profit organization dedicated to fostering a love for Mathematics and Science among learners in Masia Village and its surrounding areas. Our core mission is to provide academic support that enhances learners' knowledge and skills in Mathematics and Physical Sciences, ultimately increasing participation in these critical subjects.

Vision

Our vision is to nurture a passion for Mathematics and Science, cultivating a positive attitude and willingness to engage with these fields among learners.

Mission

MMSA aims to deliver comprehensive academic support programs and services designed to improve learners' content knowledge and inquiry skills in Mathematics and Physical Sciences. We are committed to increasing the number of students enrolling in these subjects from grades 10-12, especially within Masia and surrounding communities.

CORE VALUES

A

Accountability

At MMSA we take responsibilities for our actions.

B

Transparency

Our efficiency is built on honesty and openness.

C

Integrity

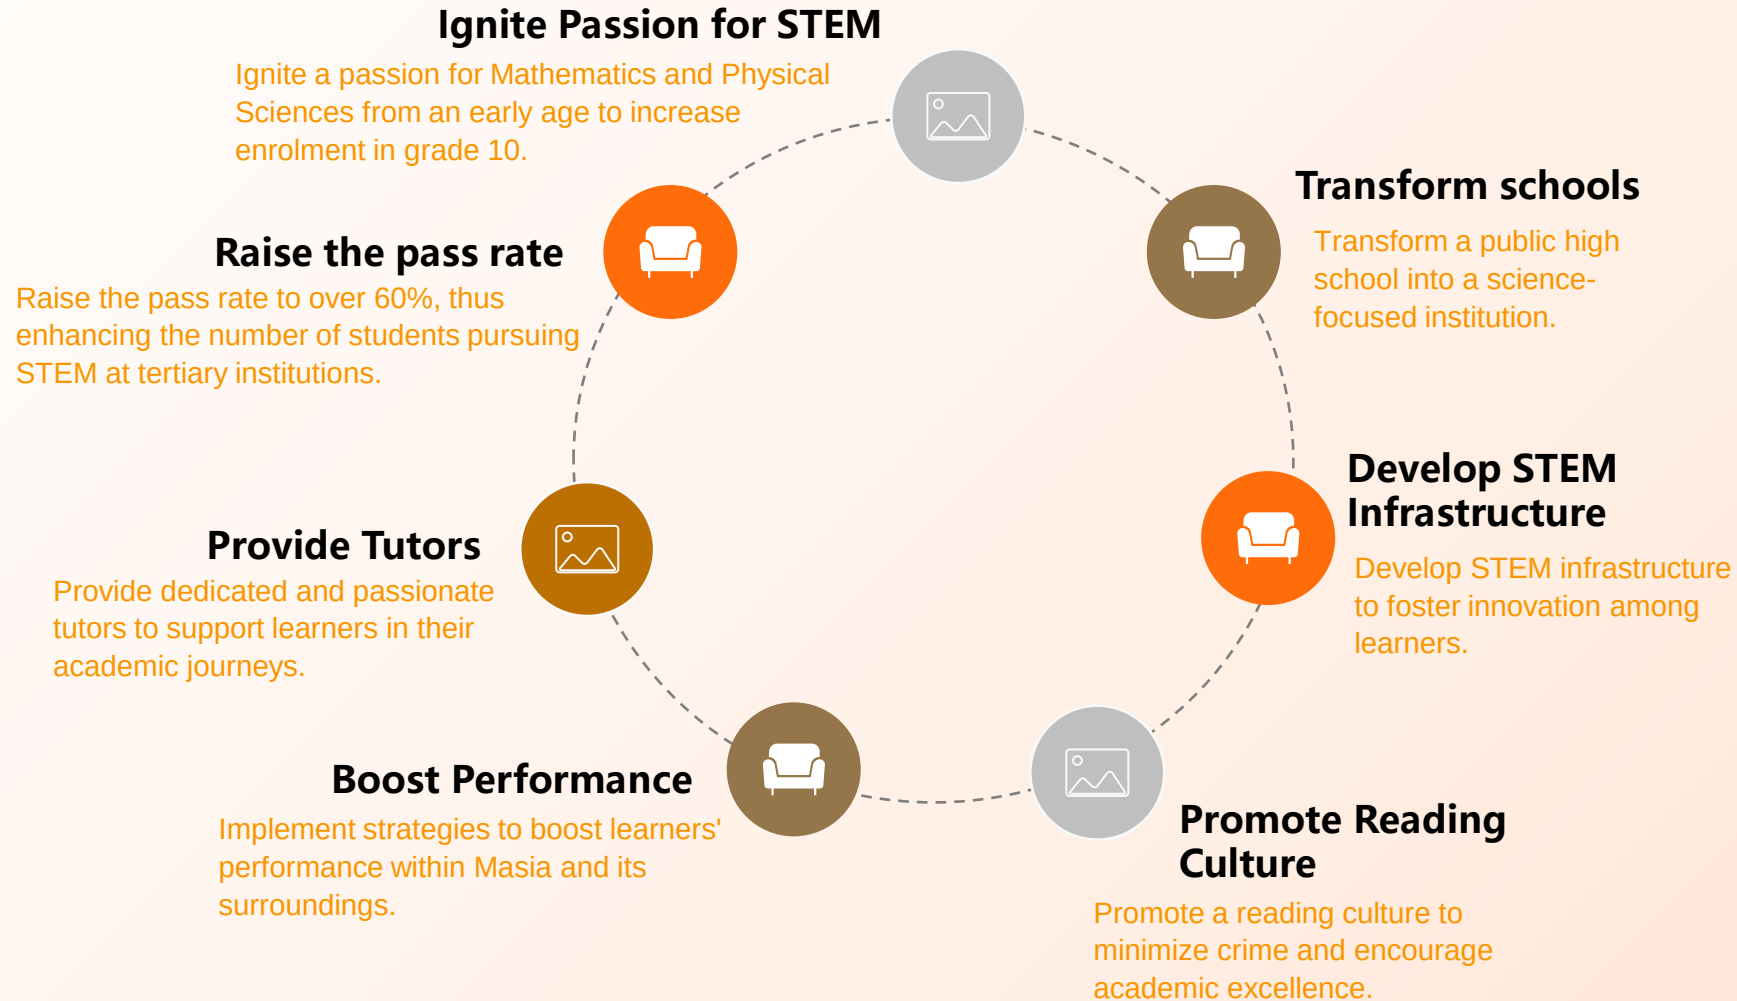

We are committed to do what is right under all circumstances.

D

Ethics

We promote high moral and ethical convictions in the course of work.

STRATEGIC OBJECTIVES

01

CORE PROGRAMMES

Masia Maths and Science Academy is a non-profit organisation situated at Masia Village, it is currently housed at Ramauba Secondary School with its two blocks of five classrooms and five laboratories (two computer laboratories and three science laboratories).

MMSA is currently supporting 5 high schools and 14 primary schools around Masia and Hlanganani area. We have adopted Ramauba Secondary School since the school has been struggling over the year. MMSA is a vehicle to socio economic transformation in our rural communities. We believe that education can safely close the gap between the previously disadvantaged communities and the currently developed area. Our communities need more facilities of this nature that encourage academic excellence. MMSA is a seed of hope to rural learners as they now learn science more practically in the science laboratories.

CORE PROGRAMMES

MMSA Intervention Programme (MIP)

MIP offers intervention lessons for grades 8-12, focusing on closing learning gaps. We cater to learners lacking subject educators, providing critical support in Mathematics, Physical Sciences, Life Sciences, and English. In 2024, we welcomed 365 learners, demonstrating the high demand for our services despite financial constraints.

ICT Academy

The MMSA ICT Academy introduces learners to essential computer literacy skills necessary for the 4th Industrial Revolution. In 2024, we enrolled 780 learners from 14 primary schools and also provide training for unemployed youth. Our state-of-the-art laboratories ensure that every learner has access to individual computers.

CORE PROGRAMMES

MMSA Career Programme

This program offers guidance through workshops, presentations, and excursions focused on career exploration, tertiary studies, and self-development. We also assist out-of-school youth in finding employment and educational opportunities through our walk-in centre.

Learner Profiling and Counselling Services

Our counselling program provides comprehensive self-development and psychological support, including subject choice guidance and family intervention services, led by a qualified social worker.

02

SUPPORT PROGRAMMES

SUPPORT PROGRAMMES

Maths Pioneers Programme (MPP)

Designed for grades 4-9, MPP aims to instil a passion for Mathematics early on. In 2024, we engaged 150 learners, reinforcing their foundation in Math and challenging the notion that it is difficult.

External Special Programs

We promote STEM careers through participation in various competitions and expos, enhancing learners' exposure to external opportunities and fostering interest in STEM subjects. This include but not limited to Maths Olympiad, MINTEK quiz, South African water prize, Science expos, Science Expos, Science Olympiad, ESKOM expo and other expos to be hosted from local to international level.

SUPPORT PROGRAMMES

Adopt a School Programme

MMSA has adopted Ramauba Secondary School to address the shortage of qualified educators in Mathematics and Life Sciences. Since our involvement, the school has since improved its results from 50,9% in 2021, 65,5% in 2022 and 88,5% in 2023. The school was awarded the most improved school award for Vhuronga 2 circuit.

STEM Girl Child Programme

This initiative empowers female learners in STEM fields, providing mentorship and discussions with successful women in these careers, particularly during Women's Month in August.

09H30 – 11H00	Life Sciences	Maths	English	Physical Sciences	Comp Literacy	Maths	English	Natural Sciences
11h00 – 11h40	Break time							
11h40 – 13h10	Physical Sciences	English	Maths	Life Sciences	Natural Sciences	English	Comp Literacy	Maths
13h10 – 14h40	English	Physical Sciences	Life Sciences	Maths	English	Natural Sciences	Maths	Comp Literacy

ENSURING LEARNER SAFETY

1

Community/ Parent Collaboration

Our learners rely on transportation to and from the academy. In collaboration with parents, we ensure the safe and reliable transport of students. To facilitate this, we have contracted a bus service that collects students from their homes at 06:30 each morning for the journey to the academy.

Until June 2023, parents were responsible for paying the monthly transport fees. Since July 2023, however, the cost of transportation has been fully funded by the academy, ensuring continued access to safe transport for all students.

2

Transportation Services

MMSA is currently collaborating with five high schools—Khomanani High School, Ramauba Secondary School, Tshinavhe Secondary School, Jaji Secondary School, and Ongedacht Secondary School—as well as fourteen primary schools—**Mashaa Primary, Munwai Primary, Vhangani Primary, Shandukani Primary, Mihuvhini Primary, Tshirunzanani Primary, Thomas Ntshavheni Primary, Avhatondwi Primary, De-Hoop Primary, Matsila Primary, Gija Primary, Nkuzana Primary, Khaphakhapha Primary, and Majosi Primary.**

In 2024, the academy admitted a total of 365 learners in grades 8-12 and 780 learners in grade 7. For the first time, MMSA has introduced a grade 8 intake to meet the growing demand for our programs from parents of grade 7 students in our other educational offerings. This expansion will help address the educational needs of students transitioning from primary to secondary education.

Additionally, MMSA is working in partnership with the **Limpopo Department of Education** to enhance support for our grade 12 learners, ensuring they receive the resources and guidance needed for academic success.

MMSA FINANCE AND SUSTAINABILITY

FUNDING

MMSA is a registered non-profit academy that provides education to learners from financially disadvantaged backgrounds. Operating as a non-fee academy, we rely on donations, sponsors, and grants to fund our programs. Since our founding in 2018, we've grown with the support of our generous donors, and we deeply appreciate their ongoing contributions, which have been vital to our success.

SUSTAINABILITY

To ensure long-term sustainability, MMSA has begun generating income through a small tuck-shop, helping cover basic operational costs. We also benefit from partnerships with Ramauba Secondary School for secure facilities and maintenance, as well as in-kind support from the University of Venda, Vhembe FET College, and local communities.

Looking forward, MMSA aims to develop a self-sustaining funding model by applying for additional grants from corporates and organizations supporting education, ensuring the continued success and impact of our academy.

MEET THE BOARD OF DIRECTORS

All Members of the board are Non-Executive Directors (NEDs) in the MMSA constitution. It is important to note that the managing director is an ex officio Member of the Board of Directors. As of 01 November 2022, the MMSA Board of Directors was composed of the following Members:

Non-Executive Directors

Mr. Tshishonga P,
Mr. Thenga A,
Mr. Sadiki TM,
Mr. Mkasi T,
Mrs. Masia T, and
Mr. Mandende MW

Leadership and Founders

Mrs Ngaledzani NP, founder and managing director

Educational qualifications: LLB degree, Honours Mine Survey and Post graduate certificate in education

Current Position: Unemployed

Mr Mulaudzi TP, founder and Operational Manager

Educational qualifications: B.Sc. in Chemistry and Mathematics, B. Ed honours in Mathematics, B. Ed honours in Education Management and currently pursuing Master's in Mathematics Education

Current Position: Department of Education- Principal

Mr Baloyi HE, founder and financial manager

Educational qualifications: Secondary Teachers Diploma (Maths and Biology), Further Teachers Diploma (Maths and Physical Sciences), Bsc in Botany, Zoology and Chemistry, Honours in Botany, and master's in science education.

Current Position: Department of Education- Circuit manager
